

Live Project Briefs

Market Research & Analytics

2 projects curated for the Analytics track.

Role	Market Research & Analytics
Projects	2

A light, structured handbook for understanding expectations, planning work, and preparing the final live project submission.

PROJECT TOOLKIT

Live Project Guidelines

Core guidance students should review before working on any live project.

General Guidelines for Live Projects

1. **Individual or Group Participation:** Students may complete the project individually or form a group of up to **four (4) members**. Group formation is entirely at the students' discretion; however, **all group members must belong to the same college/institution**.
2. **Weekly Project Reviews:** Students are expected to attend and follow the instructions, guidance, and action items shared by the Project Manager during the weekly live project review sessions.
3. **Self-Paced Learning:** This is a **self-paced Live Project**, and no strict weekly deadlines have been assigned to accommodate students' academic commitments. However, students are strongly encouraged to maintain consistent progress and actively participate throughout the project to maximize their learning experience.
4. **Recommended Time Commitment:** Students should dedicate approximately **2-3 hours per week** to successfully complete the project and achieve the intended learning outcomes.
5. **Project Report Submission:** Upon completion of the project, students must prepare a comprehensive **Project Report** in either **Microsoft Word (.doc/.docx)** or **PowerPoint (.ppt/.pptx)** format for evaluation. There is **no prescribed page or slide limit**. Students are encouraged to demonstrate originality and creativity by designing their own report structure and presentation format.
6. **Project Completion & Certificate:** There is **no fixed deadline** for submitting the Live Project report. Students may submit their project at any time after completing all the required work. Upon successful evaluation, the **Live Project Completion Certificate** will generally be issued within **3-4 working days**.
7. **Project Selection:** Students may choose **any one of the available Live Projects**. Those enrolled in multiple project roles may either work on all projects simultaneously or complete them sequentially, based on their convenience.
8. **Group Submission Policy:** For group projects, all team members must work on a common project report. However, **each member is required to submit the report individually through their own LMS account** to be eligible for evaluation and certification.
9. **Submission Process:** **All project submissions will be accepted exclusively through the LMS Portal**. Reports submitted via email, WhatsApp, Google Drive links, or any other platform will **not** be considered for evaluation.

**PROJECT TOOLKIT****How to Start your Project (4-week Framework)**

Suggested weekly rhythm for planning, analysis, drafting, and final submission.

Week-wise Roadmap for Live Project Completion**Important Note**

The following roadmap is a **recommended four-week learning framework** designed to help students approach the Live Project in a structured and industry-oriented manner.

Since this is a **self-paced project**, students who wish to complete the project earlier are welcome to do so. However, they are **strongly advised to follow the same sequence of activities (Week 01 -> Week 02 & 03 -> Week 04)** to ensure a systematic learning experience.

Students may accelerate the pace of execution but **should not skip or rearrange any stage of the project workflow**, as each phase builds the foundation for the next.

Week 01 - Market Research & Company Understanding**Objective**

The objective of Week 1 is to develop a comprehensive understanding of the company, industry, customers, and business environment before beginning the project execution.

1. Project Selection

- Review the list of available Live Projects under your selected role.
- Select one project that you wish to work on as your Live Project.

2. Company & Market Research

Conduct detailed research on the company from multiple functional perspectives to develop cross-functional business thinking. This will help you understand how different business functions contribute to solving real-world problems.

Your research should include:

- Understanding the company's objectives and core offerings
- Company Analysis
- Product & Service Analysis

- Website Analysis
- Website User Experience (UX) Analysis
- Customer Segment Analysis
- Competitor Analysis

3. Business Framework Analysis

Based on your research findings, apply relevant business and strategic frameworks to understand the company's current position and future opportunities.

Suggested frameworks include:

- SWOT Analysis
- PESTEL Analysis
- Ansoff Matrix
- Any other relevant strategic framework applicable to your project

4. Digital Landscape Research

Evaluate the company's online presence and digital positioning by conducting research on:

- Official website and digital assets
- Social media platforms
- Brand visibility and customer engagement
- Existing marketing strategies
- Competitor social media analysis
- Market gaps and potential opportunities

Week 02 & Week 03 - Project Execution & Deliverables

Objective

The objective of this phase is to solve the assigned business problem by applying your research findings and analytical skills.

Students should:

- Work on the project objectives and deliverables specified for their selected Live Project.
- Perform additional market research wherever required.

- Conduct data analysis and interpret findings.
- Brainstorm and evaluate multiple solution approaches.
- Develop practical, research-backed recommendations.
- Continuously refine the project based on insights generated throughout the execution phase.

This stage should focus on demonstrating:

- Problem-solving ability
- Strategic thinking
- Practical business recommendations

Week 04 - Final Recommendations & Project Report Submission

Objective

The final week should focus on consolidating all your work into a professional project report.

Students should:

- Prepare the final project report in either **Microsoft Word (.doc/.docx)** or **PowerPoint (.ppt/.pptx)** format.
- Organize the report in a logical and professional manner.
- Compile all research findings, analyses, project outcomes, and supporting evidence.
- Present actionable business recommendations and implementation strategies.
- Review and proofread the report before submission through the **LMS Portal**.

The final report should clearly demonstrate:

- Research methodology
- Analytical thinking
- Business understanding
- Recommendations
- Overall project outcomes

MARKET RESEARCH & ANALYTICS

Project Details

Project 1

GenAI-Driven Market Research & Strategic Analysis of the Consulting Landscape

Company	Skilled Sapiens
Role Category	Analytics

Project Brief

As a **Market Research Analyst and Strategy Consultant**, your responsibility is to help Skilled Sapiens make data-informed business decisions by conducting structured market research and strategic analysis using both conventional research methodologies and Generative AI tools.

Depending on the chosen business problem, you may analyze emerging skill trends, evaluate customer personas, benchmark competitors, identify market opportunities, or design scalable market research frameworks. Throughout the project, your role is not merely to collect information but to interpret research findings, validate assumptions, identify meaningful patterns, and transform fragmented data into actionable business recommendations.

Generative AI should be used as an analytical accelerator that improves research efficiency, supports idea generation, organizes information, and assists in synthesizing complex findings. However, students are expected to exercise independent judgment, validate outputs, and apply business reasoning while developing their final recommendations.

The final outcome should demonstrate a structured consulting approach to solving real business problems while showcasing the ability to combine research methodologies, analytical thinking, and AI-assisted insight generation.

Objectives

The objective of this project is to develop a structured market research and strategic analysis framework that enables Skilled Sapiens to make informed business decisions based on market intelligence, customer insights, and competitive benchmarking.

Students are expected to conduct comprehensive market research, analyze customer behavior, evaluate competitor positioning, identify emerging opportunities, and develop actionable recommendations that support business growth. Throughout the project, they will also learn how Generative AI can be effectively used as a research assistant to improve productivity, organize information, validate hypotheses, and generate strategic insights without replacing critical thinking and analytical reasoning.

Action Items

Introduction

In today's rapidly evolving business environment, organizations must make strategic decisions based on reliable market intelligence, customer insights, and competitive analysis. As industries continue to transform due to technological advancements, changing consumer behavior, and increasing competition, businesses can no longer rely solely on intuition or historical experience to guide their growth strategies. Structured Market Research and Analysis (MRA) has therefore become a critical business capability for identifying opportunities, understanding customer needs, evaluating competitors, and developing sustainable competitive advantages.

Skilled Sapiens operates in the experiential learning, leadership development, and consulting ecosystem through its Campus Connect and Business Connect initiatives. As the organization continues to expand its portfolio of leadership programs, live projects, mentorship services, and business consulting offerings, it becomes increasingly important to understand the evolving market landscape and continuously refine its strategic positioning.

This project provides students with an opportunity to work as **Market Research Analysts and Strategy Consultants**, leveraging structured research methodologies alongside Generative AI tools such as ChatGPT to conduct business research and develop strategic recommendations. Rather than simply collecting information, students will learn how to synthesize research findings, validate assumptions, generate meaningful business insights, and present executive-ready recommendations similar to those delivered by consulting firms.

The project emphasizes analytical thinking, structured problem solving, and strategic storytelling while demonstrating how GenAI can accelerate research and improve the quality of business decision-making.

Suggested Research Areas

Students are encouraged to explore topics such as market research methodologies, business strategy, competitive intelligence, customer segmentation, Jobs-to-be-Done (JTBD), market sizing techniques, value proposition design, strategic positioning, consulting frameworks, EdTech industry trends, Generative AI applications in business research, and executive communication.

Expected Learning Outcomes

Upon successful completion of this project, students will develop practical capabilities in conducting end-to-end market research, analyzing competitive landscapes, understanding customer behavior, and generating strategic business insights. They will learn how to apply consulting frameworks to real business challenges, structure executive-ready recommendations, and effectively leverage Generative AI as a decision-support tool for research and analysis.

The project will strengthen participants' analytical thinking, business problem-solving, strategic communication, and research capabilities while preparing them for careers in consulting, market research, business analysis, strategy, product management, and growth functions where data-driven decision-making and AI-assisted workflows are becoming increasingly important.

Deliverables

Industry & Market Analysis Report

Students will prepare a comprehensive report providing an overview of the consulting, mentorship, professional learning, and upskilling industry. The report should examine current market trends, industry growth drivers, emerging technologies, customer expectations, and factors influencing demand. Students should also analyze the broader business environment and identify opportunities that may impact the future growth of Skilled Sapiens.

Market Opportunity Assessment

Students will evaluate the market potential for Skilled Sapiens by identifying high-growth opportunities across different domains, learner segments, and service categories. The assessment should include market sizing assumptions, opportunity prioritization, and a structured evaluation of potential growth areas based on available research and logical business assumptions.

Customer & Learner Insight Framework

Students will develop a structured understanding of Skilled Sapiens' target audience by creating customer personas and analyzing learner behavior. The framework should identify customer motivations, career aspirations, learning preferences, decision-making factors, and barriers to enrollment. Students are encouraged to apply customer-centric frameworks such as Jobs-to-be-Done (JTBD) and behavioral segmentation to better understand learner expectations.

Competitive Landscape Analysis

Students will conduct a detailed competitor analysis of organizations operating within the consulting, mentorship, and professional upskilling ecosystem. The analysis should compare competitors across parameters such as market positioning, product offerings, pricing strategies, delivery models, mentorship approach, customer engagement, and overall value proposition. Based on these findings, students should identify competitive gaps, differentiation opportunities, and potential white spaces that Skilled Sapiens can leverage.

Strategic Recommendation Report

Based on the research findings, students will prepare a strategic recommendation report highlighting key business insights, market opportunities, and practical recommendations for Skilled Sapiens. The report should include suggestions related to product positioning, market expansion, customer engagement, pricing strategy, program development, and competitive differentiation. Recommendations should be supported by research findings and aligned with the organization's long-term business objectives.

Executive Summary Presentation

Students will prepare a professional executive presentation summarizing the research methodology, major findings, competitive insights, customer analysis, and strategic recommendations. The presentation should communicate the most important business insights in a concise and structured manner suitable for

leadership discussions and strategic decision-making.

Project 2

Strategic Market Research & Business Growth Plan for Skilled Sapiens

Company	Skilled Sapiens
Role Category	Analytics

Project Brief

The primary goal of this project is to analyze the B2B consulting landscape and develop a comprehensive growth strategy for Skilled Sapiens. This involves:

- **Market Research:** Identifying trends, demands, and gaps in the B2B consulting sector.
- **Competitor Benchmarking:** Analyzing competitors' offerings and strategies to identify Skilled Sapiens' unique value propositions (UVPs).
- **Target Audience Profiling:** Defining key client personas based on industry verticals, company size, and growth stage.
- **Service Diversification:** Recommending potential service offerings or enhancements based on market needs.
- **Market Penetration Strategy:** Develop actionable steps to increase visibility, engagement, and conversions in target markets.

Objectives

1. Industry & Market Analysis

- Research current trends, growth opportunities, and demand drivers in the B2B consulting, leadership training, and mentorship industry.
- Analyze emerging business needs, industry challenges, and technological developments influencing client expectations.
- Identify high-growth sectors and potential market opportunities for Skilled Sapiens.

2. Competitor Analysis

- Benchmark Skilled Sapiens' service offerings against leading consulting firms, corporate training providers, and business advisory organizations.
- Compare competitors' positioning, pricing models, service portfolios, customer engagement strategies, and marketing approaches.
- Identify market gaps and opportunities where Skilled Sapiens can differentiate itself.

3. Target Market Segmentation

- Identify and segment potential B2B clients based on industry, company size, business stage, and organizational needs.
- Develop detailed client personas for startups, SMEs, educational institutions, and corporate organizations.
- Prioritize target customer segments based on market potential, strategic fit, and revenue opportunities.

4. Value Proposition Development

- Evaluate the key challenges and pain points faced by different B2B customer segments.
- Develop segment-specific value propositions highlighting how Skilled Sapiens' consulting, mentorship, and learning solutions address business needs.
- Recommend positioning and messaging strategies that clearly communicate the organization's unique value proposition.

5. Go-to-Market (GTM) Strategy

- Develop a research-based Go-to-Market strategy for expanding Skilled Sapiens' B2B consulting and mentorship services.
- Recommend suitable customer acquisition channels, partnership opportunities, and outreach strategies.
- Propose high-level content, thought leadership, webinar, and LinkedIn engagement strategies to strengthen brand visibility and generate qualified business leads.

Action Items

Introduction

Skilled Sapiens, a leading consulting firm, is committed to empowering businesses and individuals through experiential learning and strategic mentorship programs. With its focus on B2B offerings, including corporate consulting and entrepreneurial mentorship, the firm aims to expand its footprint in the competitive consulting market. This project involves conducting in-depth market research to identify growth opportunities, develop competitive strategies, and create a roadmap for scaling Skilled Sapiens' B2B services.

The project leverages data-driven insights and strategic frameworks to position Skilled Sapiens as the go-to partner for businesses seeking mentorship, workforce upskilling, and consulting solutions.

Implementation Plan

Phase 1: Market & Industry Research

- Conduct secondary research to understand the B2B consulting, corporate training, and mentorship landscape.

- Analyze industry trends, market opportunities, and demand drivers.
- Benchmark leading consulting firms to identify best practices and differentiation opportunities.

Phase 2: Target Market & Customer Analysis

- Identify and segment potential B2B customer groups such as startups, SMEs, educational institutions, and corporate organizations.
- Develop detailed client personas based on industry, business challenges, and consulting needs.
- Prioritize high-potential customer segments for Skilled Sapiens' services.

Phase 3: Strategy Development

- Develop strategic recommendations for service positioning, market penetration, and business growth.
- Create value propositions and messaging frameworks for different client segments.
- Recommend suitable customer acquisition channels and engagement strategies.

Phase 4: Go-to-Market Strategy & Final Recommendations

- Develop a high-level Go-to-Market (GTM) strategy for expanding Skilled Sapiens' B2B consulting and mentorship services.
- Recommend content, thought leadership, LinkedIn, webinar, and partnership strategies for lead generation.
- Present a final consulting report summarizing research findings, strategic recommendations, and expected business impact.

Phase 5: Growth & Scalability Planning

- Recommend a roadmap for scaling Skilled Sapiens' B2B consulting operations.
- Suggest frameworks for strengthening long-term client relationships and improving customer retention.
- Recommend key business metrics and tools for monitoring growth, client engagement, and overall business performance.

The implementation plan provided above serves as a **recommended framework** for approaching the project. Students are encouraged to follow this structure as a reference to ensure systematic execution.

However, students are also free to **design and propose their own implementation plan** if they believe another approach would better address the business problem. Any alternative implementation plan should be **well-structured, research-driven, logically sequenced, and aligned with the project objectives and expected deliverables**. The focus should remain on developing a practical and strategic solution for the business problem.

Deliverables

Deliverable 1: Market Insights Report

Conduct comprehensive market research to understand the B2B consulting landscape and identify opportunities for Skilled Sapiens.

The report should include:

- Industry trends and emerging opportunities in the consulting and corporate learning market.
- Market size, growth drivers, and future outlook.
- Demand analysis across different industries.
- Competitive landscape and benchmarking of key consulting firms.
- Insights into competitors' service offerings, positioning, and growth strategies.
- Key opportunities and recommendations for Skilled Sapiens.

Deliverable 2: Target Audience Segmentation Framework

Develop a structured customer segmentation framework to identify and prioritize high-potential business clients.

The framework should include:

- Segmentation based on industry, company size, business maturity, and decision-makers.
- Client profiles highlighting business objectives, pain points, and consulting requirements.
- Customer needs assessment for different business segments.
- Prioritization of target segments based on market potential, revenue opportunity, and strategic fit.
- Recommended engagement approach for each target segment.

Deliverable 3: Value Proposition Matrix

Develop a value proposition framework that aligns Skilled Sapiens' services with client needs.

The framework should include:

- Identification of key customer pain points.
- Mapping of Skilled Sapiens' consulting and learning solutions to business challenges.
- Unique Value Propositions (UVPs) for different client segments.
- Positioning recommendations to differentiate Skilled Sapiens from competitors.
- Messaging framework for communicating value across different customer segments.

Deliverable 4: Strategic Roadmap for Service Diversification

Recommend opportunities to expand or enhance Skilled Sapiens' service portfolio based on market research.

The roadmap should include:

- Identification of new service opportunities.
- Recommendations for improving existing consulting and learning offerings.
- Market demand assessment for proposed services.
- Prioritization of service opportunities based on business impact.
- High-level launch and adoption roadmap for new services.

Deliverable 5: Go-to-Market (GTM) Strategy

Develop a research-based Go-to-Market strategy for expanding Skilled Sapiens' presence in the B2B consulting market.

The strategy should include:

- Target customer acquisition approach.
- Recommended marketing and sales channels.
- Brand awareness and positioning initiatives.
- Campaign ideas for LinkedIn, webinars, industry events, email marketing, and thought leadership.
- Customer engagement and lead nurturing recommendations.
- Success metrics for evaluating GTM effectiveness.

Deliverable 6: Growth & Scalability Plan

Develop a strategic framework for supporting long-term business growth.

The plan should include:

- Recommendations for scaling consulting operations.
- Client acquisition and retention strategies.
- Partnership and business development opportunities.
- Customer relationship management recommendations.
- Growth priorities and expansion roadmap.

- Key performance indicators (KPIs) to measure business growth and scalability.
